Reply to Office Action Dated 7/16/03

Amendments to the Specification

Please replace the paragraph beginning at page 7, lines 12-23 with the following amended paragraph:

-- The support bar tab 112 on the support ~~arm~~ bar 110 of bracket 100 with peripheral device 40 attached thereto is inserted in the support tab slot 17 positioned along the lateral face ~~[[17]]~~ 16 of the chassis 10 (which may include either the chassis panel or frame) opposite that of the lateral face 14 (see FIG. 5A), as shown in FIG. 4D. The face plate 102 is pivoted towards the lateral face 14 of the chassis 10, and the hook portion 108 of the face plate 102 engages and hooks behind the chassis lance 25, as illustrated in FIG. 4E. As this occurs, the front panel 46 of the peripheral device 40 commences entry into the aperture 15 of the lateral face 14 of the chassis 10. The bracketed peripheral device 40 is manually pressed downward until the front panel 46 of the peripheral device 40 snaps into fully seated position within the aperture 15, as illustrated in FIG. 4F and 5B.--
